## Counting Angles

**Example**

Number of acute angles:   1    
 Number of obtuse angles:   1    
 Number of right angles:   2  

For each figure, count the number of angles of each type.

<p>1) </p> <p>Number of acute angles: _____                  Number of obtuse angles: _____                  Number of right angles: _____</p>	<p>2) </p> <p>Number of acute angles: _____                  Number of obtuse angles: _____                  Number of right angles: _____</p>

# TRIANGLE CENTERS

## posters

### MEDIAN

A line segment that connects the vertex of a triangle to the midpoint of the opposite side.

### ANGLE BISECTOR

A line segment that divides an angle into two equal parts.

### PERPENDICULAR BISECTOR

A line segment that passes through the midpoint of a side of a triangle and forms a right angle.

### CIRCUMCENTER

The point where 3 perpendicular bisectors of a triangle meet.

### CENTROID

The point where 3 medians of a triangle meet.

### INCENTER

The point where 3 angle bisectors of a triangle meet.

Here you will find a selection of printed 2d and 3d sheets. Each sheet is available in color or black and white, and tagged or unlabeled. Using these leaves will help your child: recognize and name a range of 2d and 3d forms; recognize regular and irregular forms. Printable shapes - 2D and 3D Shape Sheets Here you will find a selection of 3D shaped sheets designed to help your child learn their 3d shape names and properties. Using these leaves will help your child: recognize a range of 3D forms; know some of the properties of different 3D forms; recognize 3d shapes in different orientations and sizes. All free printed sheets in this section support the Elementary Math parameters. Here you will find our range of Free Nets for 3D Shapes. The following printables contain common 3D forms networks that your child should know. Each network sheet is available both with and without tabs to help you paste together. Using these leaves will help your child: know the properties of different 3d forms; recognize different 2d forms within 3d forms; build a 3d form of a network; experience the fun and wonder of creating a 3d form of a network. All Free Printable Geometry Sheets in this section support Math Reference Points. Here you will find a list of different geometric shapes. Included with each form is a small image and description of the properties that have the shape and how it relates to other forms. Included in this page are the following forms: quadrilateral polygon regular polygons a range of 3d forms All printable geometry worksheets in this section support the parameters of elementary mathematics. Here you will find a support pagina to help you understand some of the special characteristics of the triangles, particularly the correct triples. The use of this support pagina will help it: Understand the different types and properties of triangles; Understand how to find the one of a trial; Know and use and apply the Pitag theorem. All free printable geometry leaves in this section admit the reference points of elementary mathematics. Questions of the Triangles of Geometry Triangles here will find a range of geometry trick leaves to help you answer a variety of geometry questions. The leaves contain information about E;ngles, types and properties of 2D and 3D forms, and also commonly associated with 2D and 3D forms. This pagina includes: images of common forms 2d and 3d; Properties of 2D and 3D forms; Fixes that involve 2D forms, such as Erre and perimeter, Pitena theorem, trigonometry laws, etc. Files that involve 3D forms on volume and surface area. The use of the leaves of this section to help you understand and answer a variety of geometry questions. In this section you will find our range of geometry work sheets, printable network sheets, list of geomâ© tricas and geometry formulas printable. Like some work sheets in a 2D printable way? Do you need some symmetry work sheets? How many leaves on the properties of the 2D forms? We have a great selection of work sheets 2D printable for a variety of skills.
